

## How to Use this Template

1. Create a new document, and copy and paste the text from this template into your new document [ Select All → Copy → Paste into new document ]
2. Name your document file: “**Capstone\_Stage1**”
3. Replace the text in green

# Your App Name Here

## Description

Write a brief summary of what your app does. What problem does your app solve?

Not sure how to write a good description? Search 5-star apps on the Play Store for inspiration.

## Intended User

Who is your intended user? (For example, is this an app for dog owners? Families? Students? Travelers?)

## Features

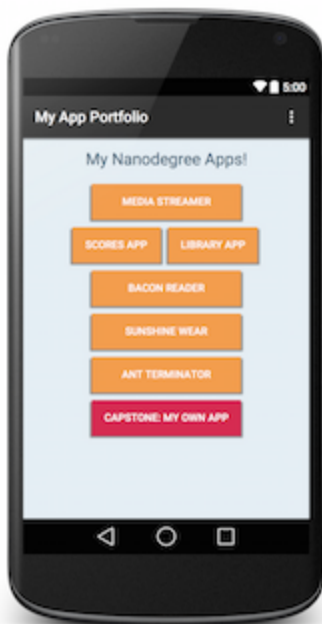

List the main features of your app. For example:

- Saves information
- Takes pictures
- Other features

## User Interface Mocks

These can be created by hand (take a photo of your drawings and insert them in this flow), or using a program like Google Drawings, [www.ninjamock.com](http://www.ninjamock.com), Paper by 53, Photoshop or Balsamiq.

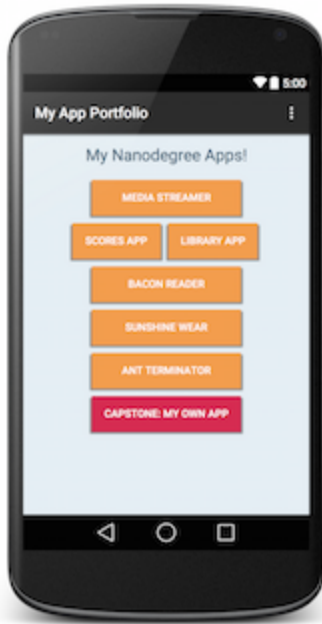

### Screen 1

Replace the above image with your own mock [ click on the above image, then navigate to Insert → Image... ]

Provide descriptive text for each screen

## Screen 2

Replace the above image with your own mock [ click on the above image, then navigate to Insert → Image... ]

Provide descriptive text for each screen

Add as many screens as you need to portray your app's UI flow.

## Key Considerations

**How will your app handle data persistence?**

Describe how your app will handle data. (For example, will you build a Content Provider or use Firebase Realtime Database?)

**Describe any edge or corner cases in the UX.**

For example, how does the user return to a Now Playing screen in a media player if they hit the back button?

**Describe any libraries you'll be using and share your reasoning for including them.**

For example, Picasso or Glide to handle the loading and caching of images.

**Describe how you will implement Google Play Services or other external services.**

Describe which Services you will use and how.

## Next Steps: Required Tasks

This is the section where you can take the main features of your app (declared above) and break them down into tangible technical tasks that you can complete one at a time until you have a finished app.

### Task 1: Project Setup

Write out the steps you will take to setup and/or configure this project. See previous implementation guides for an example.

You may want to list the subtasks. For example:

- Configure libraries
- Something else

If it helps, imagine you are describing these tasks to a friend who wants to follow along and build this app with you.

### Task 2: Implement UI for Each Activity and Fragment

List the subtasks. For example:

- Build UI for MainActivity
- Build UI for something else

### Task 3: Your Next Task

Describe the next task. For example, “Implement Google Play Services,” or “Handle Error Cases,” or “Create Build Variant.”

Describe the next task. List the subtasks. For example:

- Create layout
- Something else

## Task 4: Your Next Task

Describe the next task. List the subtasks. For example:

- Create layout
- Something else

## Task 5: Your Next Task

Describe the next task. List the subtasks. For example:

- Create layout
- Something else

Add as many tasks as you need to complete your app.

---

### Submission Instructions

- After you've completed all the sections, download this document as a PDF [ File → Download as PDF ]
  - Make sure the PDF is named "**Capstone\_Stage1.pdf**"
- Submit the PDF as a zip or in a GitHub project repo using the project submission portal

If using GitHub:

- Create a new GitHub repo for the capstone. Name it "**Capstone Project**"
- Add this document to your repo. Make sure it's named "**Capstone\_Stage1.pdf**"
